Softness technology

French company, Renolux – manufacturer of car seats and childcare equipment – has car safety as its driving force and visitors to Harrogate can see first-hand the new SOFTNESS technology that has been applied to its car seats. This is a unique combination of high-strength steel frame, moulded with high-density polyurethane foam to absorb energy and cushion impact shocks in the event of an accident. It is the softest most comfortable and protective car seat option for children.

The new exclusive Softness range will be available in the UK this Autumn.
